Will see what we get and when we get it... I googled arroyo grande and ae application and nothing came up, so not even sure if the package has been published in the local newspapers!

I heard nothing much for the current and future use. I get that it's not hydrologically connected, but I hope there is actually a presentation on that topic to convince us. By the way, I have no plans of getting anywhere on a review before I leave. It's all yours. ;)

David was impressed with him, and seems hopeful if others are as good as him, then DOGGR may be ok...

Hi Michele,

I haven't seen the AE package posted to DOGGR's website yet...maybe it's too early. Will be interesting to see the reorganization of the districts.
